Reasons for Allowance

1. Based on Applicant's statement of common ownership as indicated on page 8 of 9, of Applicant's response dated 08/08/06, the previously cited art (Chan, 6,460,178) has been disqualified and withdrawn. Therefore claims 1 – 20, are now in condition for allowance.

The following is an Examiner's statement of reasons for allowance.

The prior art of record does not teach or fairly suggest at least the limitations of:

“ modifying the platform neutral hierarchical intermediate representation of the heterogeneous program executing in the target system memory; and modifying an executable code in the target system memory based on the modified intermediate representation without taking the target system offline, the executable code being platform dependent and associated with the heterogeneous program ”, and as best illustrated by figures 9 and 10, in such a manner as recited in independent claims 1 and 15.

“... a transformation process configured to modify a platform neutral hierarchical intermediate representation of a heterogeneous program executing in a target system memory; and a dynamic modification process configured to modify an executable code in the target system memory based on the modified intermediate representation without taking the target system offline, the executable code being platform dependent and

associated with the heterogeneous program ", and as best illustrated by figures 9 and 10, in such a manner as recited in independent claim 20.

Therefore, all claims 1 – 20 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
